### ***Welcome to Crestone Solar School***

- Develop and Design a Sustainable Housing Future
- Train in Passive Solar Home Design Principles
- Learn to Build Passive Solar Structures
- Explore Natural Building Options

### **Passive Solar Design and Natural Building Workshops**

#### **3-Day Workshop Intensives**

**Learn by doing!** 3-day residential workshops, held in a 100% solar-heated building, cover principles and applications of solar heat gain, thermal storage, solar greenhouse, radiant floor, and solar hot water system design. The course is interactive and hands on, and includes daily field trips to observe a wide variety of passive solar and natural building technologies.

**Perfect for** owner-builders, architects, engineers, contractors, and students, and for anyone interested in designing a sustainable future, becoming energy independent, building a solar home, creating a solar business, or qualifying for employment in the rapidly growing field of renewable solar energy applications.

**Tuition: \$850 / \$750 early registration**, includes on-site camping and all meals. Accommodations also available in local AirBnB homes.

#### **2018 Workshops**

May 25-27  
June 1-3  
July 27-29  
August 24-26  
September 21-23

#### **Register Online**
